> A large-scale project, the A79 - RCEA highway

Roadway Solutions is supplying the 4 HMA plants with RW Elast® to modify a third of asphalt mix formulas. Used for identical performances as for PmB with SBS, our masterbatch extends **the lifetime of the road**, cuts **maintenance costs** and ease the everyday work.

Part of RCEA -Atlantic Center-Europe Route- the transformation of national road 79 into motorway 79 is a major project. It is connecting the Atlantic coast of France with Northern Italy, Southern Germany and Central Europe. 3 years of construction will be needed to reach the full 97 km of road widening/constructing/refurbishing. In the long terme it will be more than 15,000 vehicles/day that will use this road.
